

EANET/WGS2/4/4

The Network Center for the Acid Deposition Monitoring Network in East Asia

RECOMMENDATION FROM SAC20 TO IG22 REGARDING THE MTP FOR THE EANET (2021-2025)

The Working Group Meeting Session 2 on Draft Medium Term Plan for the EANET (2021-2025) and Reviewing the Scope of Instrument for the EANET
20-22 October 2020, Virtual Meeting

The Network Center for the Acid Deposition Monitoring Network in East Asia

EANET/WGS2/4/4

INTRODUCTION OF SAC20

- Date: 23-24 September 2020
- Type of the meeting: virtual
- Participants: SAC members of 13 participating countries of the EANET

2

2

MAIN DISCUSSION AGENDA ITEM OF SAC20

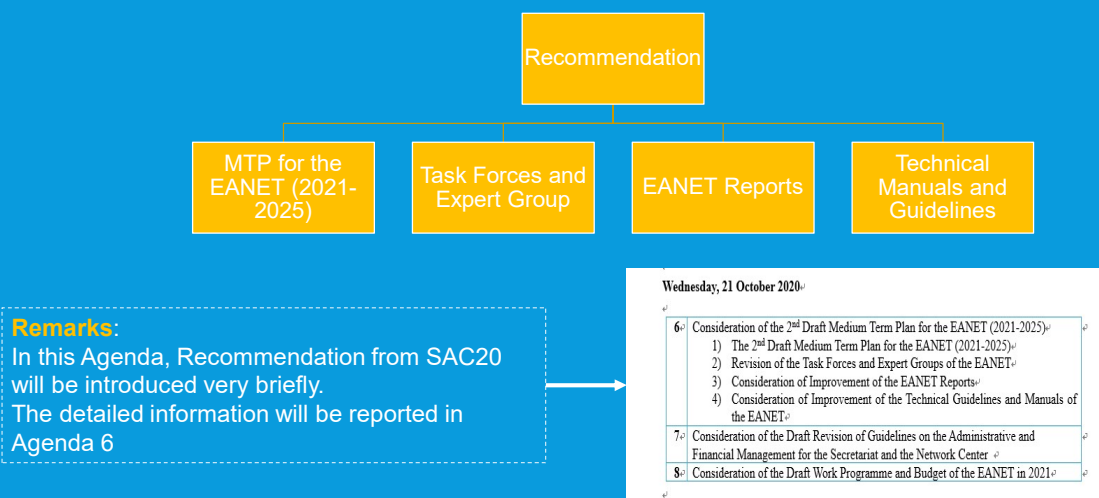

1. Survey Results (Matrix) of Categorization of the EANET Activities (EANET/SAC 20/5/1);
2. Preliminary 2nd Draft MTP for the EANET (2021-2025) (EANET/SAC 20/5/2);
3. Revision of Task Forces and Expert Groups of the EANET (EANET/SAC 20/5/3);
4. Consideration of Improvement of the EANET Reports, such as Report for Policy Makers(RPM), Science Bulletin, Fact Sheets, etc (EANET/SAC 20/5/4);
5. Consideration of Improvement of Technical Guidelines and Manuals of the EANET (EANET/SAC 20/5/5).

RECONSIDERATION OF THE MEDIUM TERM PLAN (MTP) FOR THE EANET (2021-2025)

- **Expansion of the scope of EANET activity**
 To coordinate the expansion of the scope of EANET by new activities from acid deposition to air pollution such as areas and/or phenomena where significant seasonal pollution is regionally observed, promoting analysis by using emission inventories and modeling, and strategic outreach activities, etc. proposed by the participating countries.
- **Establishment of the Project Activity**
 Coordinate with UNEP and other relevant organizations to find a flexible mechanism for expanding activities using the Project Activity.
- **Development of a comprehensive system for atmospheric environment**
 For the future EANET, as a direction of the next MTP, the development of a comprehensive system for managing and improving the atmospheric environment in East Asia should cover multi-impact, multi-scale, multi-species multi-functions.
- **To be promoted activities in the next MTP**
 As activities to be promoted in the next MTP, (1) Monitoring of air pollution-related climate change, (2) Monitoring of ecological impacts and data analysis, (3) Model analysis, (4) Assessment and its report, and (5) Capacity building related to atmospheric environment management.

CONSIDERATION OF FUNCTION OF EANET TECHNICAL GUIDELINES AND MANUALS (REORGANIZATION OF THE EANET GUIDELINES AND MANUALS)

- Guidelines for Acid Deposition Monitoring in East Asia was published in 2000, and some descriptions are not consistent with the current monitoring status. The Task Force on Monitoring for Dry Deposition and Task Force on Soil and Vegetation Monitoring will be required to revise the guideline.
- Technical Manual for Air Concentration Monitoring in East Asia and Technical Manual on Dry Deposition Flux Estimation in East Asia are under revision by the Expert Group on revision of the Technical Manuals for Dry Deposition Flux Estimation and Air Concentration Monitoring in order to elaborate air concentration monitoring methods, and dry deposition flux estimation methods respectively.
- Other manuals and guidelines are useful, but should be reviewed and revised timely for their effective utilization.

ACTION REQUIRED

- The Working Group Meeting Session 2 on Drafting MTP for the EANET (2021-2025) and Reviewing the Scope of Instrument for the EANET is invited to review The Recommendations from the 20th Session of the Scientific Advisory Committee (SAC20) to the 22nd Session of the Intergovernmental (IG22) and may wish to consider, discuss, provide guidance, and make recommendations to the IG22 for its review, guidance, and approval, as appropriate.
